1 NCT R-transaction definition

The content of this document applies to the NPC Credit Transfer (NCT) rulebook effective **as of 19 December 2020**.
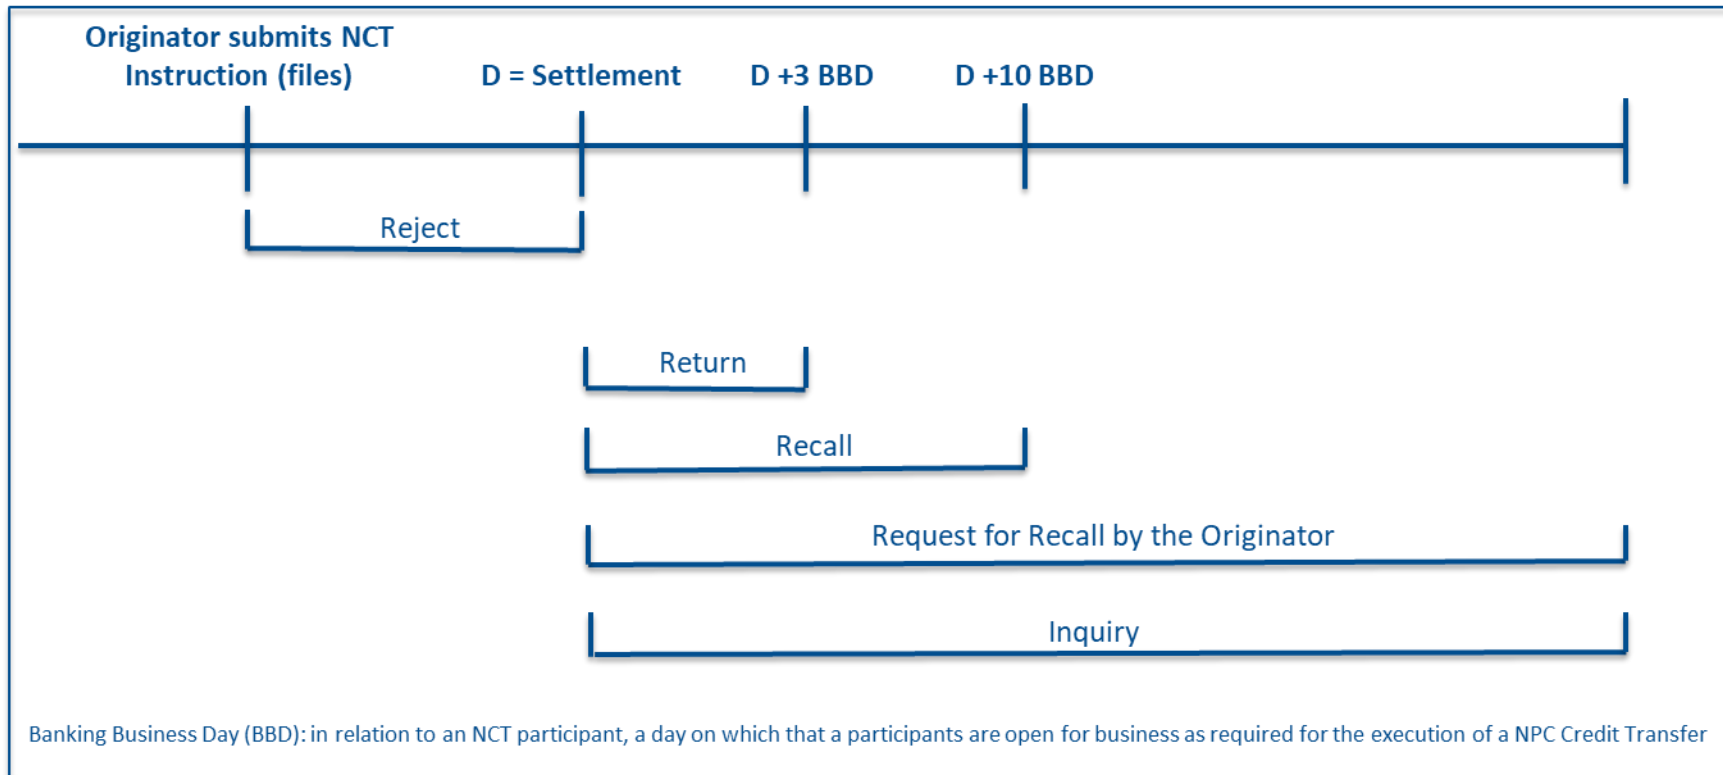

Some NCT transactions require exception handling, because one of the parties involved does not or cannot process the transaction in the normal way. This exception handling involves the sending of messages called R-transactions because their names all start with an R: Rejects, Recalls, Request for Recall by the Originator (RFRO) and Returns. The definitions of the various R-transactions are outlined in the Exception Processing Flow section of the NCT rulebook. The rulebook also defines in a separate section an NCT Inquiry process for a Claim of Non-Receipt, and for a Claim for Value Date Correction.

The type of R-transaction used depends on the point in time in the processing chain at which the R-transaction is initiated or sent as well as on the party initiating or sending the R-transaction. The process of exception handling starts at the point in the process where the problem is detected.

It is important to note that an NCT scheme participant must channel Rejects, Recalls, RFROs, Returns and NCT Inquiries through the same Clearing and Settlement Mechanism (CSM1) used for the clearing and settlement of the initial NCT transaction, unless otherwise agreed between the NCT scheme participants.

The R-transactions and the NCT Inquiries foreseen within the NCT scheme must be initiated within the timeline described below. It is pointed out that the Beneficiary Bank is in breach with the NCT rulebook if it does not send **its response:**

- to a Recall or an RFRO within **15** Banking Business Days following the receipt of the Recall or the RFRO from the Originator Bank;

- to an NCT Inquiry within 10 Banking Business Days following the receipt of the NCT inquiry from the Originator Bank.

Banking Business Day (BBD): in relation to an NCT participant, a day on which that a participants are open for business as required for the execution of a NPC Credit Transfer

2   Issues reported in the use of NPC R-transactions reason codes

Some NCT scheme participants, when acting as a Beneficiary Bank, are not applying the correct R-transaction reason codes. Therefore, all scheme participants are reminded to use the correct NCT R-transaction reason codes described in the NCT rulebook.

Section 3 of this document provides guidance to the NCT scheme participants about the reason codes to be used to report specific NCT transaction issues, NCT inquiries and related responses.

NCT scheme participants should avoid the use of general codes when a more precise reason can be given which is not legally forbidden in the country of the Beneficiary Bank.

3 Guidance in using NCT R-transaction and NCT Inquiry reason codes

Code	ISO definition	Reason in the Rulebook or IGs	Type of R-trans.	Exhausted list of use-Cases	Possible root cause	Suggested action
AC01	Incorrect Account Number	Account identifier invalid or incorrect (i.e. invalid IBAN or account number does not exist).	Reject, Return.	Reject: • Invalid format of the IBAN; • IBAN not existing at the Beneficiary Bank level. Return: IBAN not existing at Beneficiary Bank level.	• Beneficiary gave invalid IBAN; • Originator used wrong IBAN data from its customers' database; • Originator had technical problem during the processing of the NCT instruction issuance.	Originator to contact the Beneficiary to get the correct IBAN of the Beneficiary.
AC03	Invalid Creditor Account Number	Wrong unique identifier of the Beneficiary account.	RFRO.	Originator has made an NCT transaction which was addressed to a wrong IBAN.	Originator itself selected or entered a wrong IBAN of the Beneficiary when issuing the NCT instruction.
